

<b>PRODUCT</b>	<b>HARINA DE PESCADO / FISHMEAL</b>
----------------	-------------------------------------

### DESCRIPTION AND USES:

Fishmeal processed in Coomarpes Ltda is a product obtained from dehydrating and degreasing –through a process of cooking, pressing, and grinding– residues of fish of different species (mainly nonfat species such as hake, 70% approx, derived from the processing plants of frozen fish products). Fishmeal is a product rich in proteins, essential aminoacids, minerals, vitamins, fatty acid, omega-3 (DHA and EPA), essential for the rapid growth of the animals.

Fishmeal is used in animal feed: poultry, pigs, rumiants, cattle, sheep, pigs, and fish.

Dosage: Per the Nutritionist's instruction and animal's age. Basically, for baby pigs 15 %, Shrimp 35 %, Fish 30%, eel 60 %

### CHARACTERISTICS

Protein	60-64% máx.
Moisture	10% máx.
Ashes	24% máx.
Fat	10% máx.
FFA (free faty acid)	7-12% máx.
TVN	110-180 mgN/100gmáx.
Salt and sand combined	5% máx.
Sand	2 % máx.
Histamine	100 ppm máx
Digestibility (torry)	92% min.
Peroxide Index	5 meqO <sub>2</sub> /kg máx.
Antioxidant (BHT/BHA)	150 ppm min.
Smell	Characteristic
Presentation	Big Bags of 1250 kgs each, gross for net weight.
Storage	Must keep in a dry and clean place, away from sunlight, at room temperature. Durability: 18 months from production date.
